STRAWBERRY PLANTS

DON'T SETTLE FOR PLANTS JUST ADVERTISED AS "DISEASE-FREE". KNOW THE HISTORY OF THEIR PRODUCTION AND GET THE BEST.

Buntings' virus and disease-free program involves the use of our special greenhouses and our own screenhouse, plus chemical treatment of the soil in our growing fields, and strict spraying and dusting sche-

dules, which completes a program requiring three years to produce highest-quality, disease-free plants. This program is continuous and each year we have a new supply of recently indexed virus-free plants available each year, which eliminates the doubt that would arise from setting mother plants that have not been indexed for 5, 10 or 15 years. Since the cost of quality strawberry plants is minor compared to costs of producing the crop, it is important to get the best. Based upon our own yield tests and those of the United States Department of Agriculture, plants grown under our schedule produce up to 83% more fruit, also up to 40% increase in size of fruit - hence a slight increase in cost of plants is many times repaid by the great increase in profits for you and your customers.

BUNTINGS' STRAWBERRY PLANTS

(for shipment after Nov. 15, 1961)

We are facilitated to take care of your strawberry plant orders, large or small, making shipment under your tags or direct to you in large lots for re-shipment. Varieties designated by (★) in price list have been grown from virus-free foundation stock. All plants, whether marked virus-free or not, have been grown under a strict dusting schedule, and are as free from disease and insects as any available today. Let us take care of your requirements with quality stock that will live and grow.

Double Pink Weeping Peach

Queen of Hearts - This beautiful small tree does not droop as full as much as the red or the white varieties, but has more of a spreading pendulant habit which gives a superbly artistic effect. The blooms are fully double and a clean, sparkling, pure pink closely set on twisting arching branches, creating a picture that you will long remember. This little tree, even when not in bloom, is most pleasing to look at. We are sure you will highly enjoy this in a choice spot in your garden or perhaps as an isolated specimen on the lawn.
